BUREAU OF POLICE

William B. Mills, SUPERINTENDENT

Philadelphia, January 1, 1923.

Director,
Department of Public Safety.

I forward herewith report showing the operations of the Bureau of Police during the year 1922.

ARRESTS

The total arrests for the year were 99,601, compared with 83,136 in 1921, showing an increase of 16,465. There were 44,746 arrests made for intoxication, intoxication and disorderly conduct, driving automobile while intoxicated and habitual drunkard, as compared with 27,609, for the year of 1921, an increase of 17,137. The following figures show the most important arrests:

	1921	1922
Murder	85	97
Highway robbery	409	303
Burglary	86	53
Larceny	3,521	2,588
Bawdy house keepers	173	144
Bawdy house inmates	616	319
Street-walkers	229	127
Gambling house keepers	142	138
Gambling house inmates, including street crap games .	2,742	2,089
Narcotic drugs, selling and possessing	331	352
Narcotic drug users	448	683

Of the arrests for the year 69,671 were white adult males, 3,972 white adult females, 11,663 colored adult males and 1,870 colored adult females; 3,375 were under 16 years of age, and 9,050 were between 16 and 21 years of age.

In addition to the arrest of 144 persons as bawdy house keepers, 228 bawdy houses were closed and of this number 36 proprietors

vacated the premises; 26 assignation houses were closed and the keepers of 13 vacated the premises; 229 speakeasies closed and the proprietors of 25 such houses vacated the premises.

In addition to the arrest of 138 gambling house keepers, 80 gambling houses were closed, and of this number 14 proprietors vacated the premises. One thousand six hundred and sixteen gambling devices were confiscated.

ROBBERIES AND LARCENIES

There were 10,501 robberies and larcenies reported during the year, classified as follows: Robberies, 2,883; larcenies, 3,878; automobiles stolen, 3,505; cases where property was reported as lost or stolen, 235. The total value of articles lost and stolen was \$6,715,162.42, and the police recovered articles valued at \$5,594,334.01.

Three thousand five hundred and five automobiles valued at \$5,303,791.80 were reported stolen and 3,392 cars valued at \$5,237,139.25 were recovered. Included in the latter were approximately 843, which were stolen in other cities and found abandoned on the highways of this City. The methods used in committing these crimes are as follows: Automobiles, 3,505; boarders or roomers, 41; bogus agents, 10; bogus checks, 7; employees, 78; false keys, 208; false pretense, 35; flim flam, 32; forcible entry, 2,007; highway robberies, 557; hold-up stores, 101; larcenies from highway, 759; lost or stolen, 235; pick-pockets, 208; servants, 78; sneak thieves, etc., 2,640; total, 10,501. There were 4,215 thieves arrested; 883 charged with robbery and 3,332 charged with all forms of larceny.

Your attention is called to the fact that there were 9,915 doors, windows, etc., found open by the police.

DETECTIVE DIVISION

Detectives made a total of 2,417 arrests; 6,464 negatives were made; 7,004 fingerprints were taken; 2,238 photographs added to the Rogues' Gallery. Three thousand six hundred and forty-three persons were reported missing from home in this City dur-

ing the year, of which number 3,434 were located and returned. The total number of automobile transfers recorded was 49,206.

NARCOTIC DRUGS

A very creditable record has been made by the officers assigned to the task of apprehending persons for violation of the Narcotic Drug Acts as is evidenced by the arrest of 683 users, 138 sellers and 214 for having such drugs in their possession. The activity of the police along these lines renders it very difficult for persons addicted to the use of narcotics to secure their supplies.

SPECIAL INVESTIGATIONS

Credit is due for the work performed by the special squad of patrolmen in plain clothes, who were assigned to investigate complaints and verify information received regarding disorderly bawdy houses, disorderly street-walkers, gambling houses, illegal sale and possession of narcotic drugs and violations of the prohibition laws. These men made 2,278 arrests for various offenses, and of that number 1,969 were tried, 1,281 convicted, 688 acquitted, and 309 cases were awaiting disposition of the courts. Included in these figures are the arrests of persons on other charges than those mentioned above.

ACCIDENT PREVENTION DIVISION

The work performed by the accident prevention division, which was organized November 1, 1921, demonstrated the necessity for this division. A total of 9,120 accidents of all kinds was received for investigation and of this number the investigations in 5,003 cases were completed; 3,987 traffic and 1,016 other than traffic cases. Officers connected with this division made 862 arrests and the magistrate at the traffic court, a branch of the division, heard 4,877 cases in which summons were issued for traffic violations.

SPEED LIMIT AND STREET SIGNS

Additional "Fifteen (15) Mile Speed Limit" signs numbering 69 were erected at dangerous locations in the various sections

of the City for the purpose of restricting the speed of motor vehicles and 3,532 signs bearing the names of streets were placed at points where needed, also 304 of the latter signs were repaired and replaced.

TRAFFIC

The synchronized traffic control system temporarily installed on Broad Street between Arch and Norris Streets for experimental purposes is giving excellent results and meets with the approval of the public. Our records show that there has been a decrease in the number of accidents in this territory since the system was put into effect. Traffic conditions will be bettered immeasurably by the permanent adoption of this system through the use of towers on the streets. Whereas it required 29 minutes for a motor car to move from South Street to Lehigh Avenue on Broad Street under the old system of officers regulating traffic with semaphores at street intersections, the trip between these two points could be made in 13 minutes under the new system.

DRILLS AND INSTRUCTION

The members of the bureau were instructed in the evolution of military drill, care of equipment, personal appearance, military courtesy, instructions on issuing commands, use of Nedhal gas and shot guns. These instructors also co-operated with the lieutenant in command of the Police Training School. A bandit squadron was organized, armed and trained in the use and care of shot guns and regulations issued governing this body of men. A riot battalion, composed of three companies with a personnel of 108 men in each, was organized and trained in infantry drill, riot formations, use of gas, rifle and shot gun.

RADIO

The experiments conducted in the latter part of the year with a radio set placed in one of our motor patrols have given satisfactory results, so that we expect in the very near future to be able to communicate by use of the set installed in the Central Office with mobile units in patrol wagons, automobiles and

motorcycles. This method of communicating with officers on the street will increase immensely the efficiency of the bureau.

MOUNTED TRAFFIC STABLES

Extensive alterations were made to the building at Twelfth and Reed Streets to provide every facility for the housing of our mounted traffic squad, and on December 30th, the squad took possession of their new headquarters.

POLICE TRAINING SCHOOL

The work accomplished by the Police Training School proves the value of this branch of the service. There were 343 patrolmen trained at the school during the year 1922, these men making up five distinct classes with an average of 68 patrolmen to each class. Of this number 217, or 63 per cent. of the total number trained attained a general average of 70 per cent. or over. A total of 2,909 patrolmen have been trained since 1913, the year in which the school was created and these men received their instruction in 45 distinct classes giving an average of approximately 64 members to each class. Fifty-one per cent. of the entire membership of the bureau which numbers 4,927, has been trained and of the total number that attended the school 2,514 or 86 per cent. are still in our personnel.

MEDICAL DIVISION

During the year routine work has been performed as in previous years. Each member of the Bureau of Police, Bureau of Fire and Electrical Bureau has been examined during his incapacity because of sickness or injury. In each case a report has been forwarded to the chief of the bureau.

The special surgical ward, which was opened at the Philadelphia Hospital in 1921, for the exclusive use of members of the Bureaus of Police and Fire, has filled a great necessity. This ward has a capacity of eight beds, and is far too small for those applying for admission. A ward of at least 25 beds should be assigned for the use of the members of the Bureaus of Police and Fire.

During the year 1922 a complete x-ray outfit was installed in the surgeon's office. This, too, has filled a great need. The eye clinic, the neurological clinic, and the nose and throat clinic have been continued with great success.

Through the courtesy of the University of Pennsylvania Dental School the members of the Bureaus of Police and Fire have been sent to that institution for treatment of necessary dental work. Inoculation by vaccine for prevention of influenza has been continued throughout the year.

Recently an order was sent to each member of the two bureaus requiring vaccination against smallpox of those who have not been successfully vaccinated.

During the year 1922 the drug room was enlarged. Crude drugs are bought and tonics, cough mixtures, etc., are made and dispensed free of charge to the members of the two bureaus.

During the year 1922 all applicants for patrolmen and hosemen were examined by the surgeon immediately prior to assignment to duty. These applicants had previously been examined by the medical examiner of the Civil Service Commission, but during the interim of this examination and the applicants' appointments many have contracted disease or have been injured. The re-examination by the surgeon immediately prior to the applicant being sworn in has been a very important innovation.

Each member of the Bureau of Police is again examined at the end of ninety days subsequent to his appointment, and those who have failed either mentally or physically are dropped.

In November, 1922, there was held in Philadelphia a first convention of police and fire surgeons. This was attended by about 60 police and fire surgeons. All the cities in close proximity to Philadelphia were represented and many of the cities of the south, west and north were represented.

The surgical dispensary and the nose and throat dispensary have been completely refurnished.

FIRE MARSHAL'S DIVISION

Both the per capita loss and the total fire loss in the City of Philadelphia during 1922 were materially reduced, the estimated

annual loss for the year by fire on buildings and contents being \$5,070,715, and the per capita loss, based on a population of 1,825,000, being \$2.78. Compared with 1921 this is a reduction in the total loss of over \$1,000,000 and a reduction of 76 cents in the per capita loss.

During the year just past there were 6,516 fires, an increase over the year previous; but much of the increase was due to a number of brush fires and false alarms.

Garages, mills and places where high explosives are stored should be regularly inspected and cannot now because of a lack of inspectors.

Fire escapes, which should be inspected, as required by Act of Assembly, at least quarterly, cannot now be inspected annually because of lack of inspectors. As a result, many fire escapes in Philadelphia are in bad condition and, no doubt, some of them are in a very dangerous condition.

During the last two years the use of fuel oil has grown to such an extent that rigid regulations and inspections are required from this office, without any additional force of men having been provided for the increased work.

In 1922 a total of 3,196 garages were inspected and 2,621 plans approved for the erection of garages, making a total of 5,817 garages; while the survey of the Bureau of Police shows there are 17,000 garages and repair shops in the City of Philadelphia.

RECOMMENDATIONS

This bureau is being very materially hampered by the lack of room and it is almost impossible to do efficient work in the

automobile division, detective division, murder squad and criminal record room without additional space, no material additions having been made to the quarters occupied by these very important adjuncts in this bureau for the past twenty years.

I again strongly urge the appropriation to the Bureau of City Property of sufficient funds to enable us to replace the police stations in the Second, Third, Fifth, Tenth, Eleventh, Twenty-second, Twenty-fifth and Forty-second Districts, and also to make the necessary repairs to place our other properties in good condition.

I again recommend the establishment of a laboratory in charge of a competent chemist and assistants, as the work requiring the services of a chemist is constantly increasing, due to the necessity of making hundreds of analyses of alcoholic beverages and enforcement of the prohibition laws.

I endorse the following recommendations of the Chief Surgeon:

That the Department of Public Safety co-operate with the Department of Health for the purpose of obtaining an additional ward in the Philadelphia General Hospital for the treatment of the members of the Bureaus of Police and Fire.

That the surgeon's office be moved from its present location to a floor in City Hall which is accessible to elevators—or that the surgeon's office be moved from the City Hall to a nearby modern office building.

That the present system of district surgeons be discontinued, and that provision be made for the appointment of two salaried assistant surgeons, and 10 salaried division surgeons, two division surgeons to be assigned to each police division—that is, these 10 division surgeons would perform the work of the present district surgeons.

That a farm be purchased or that available ground now owned by the City be designated to be used as a convalescent farm for the members of the Bureaus of Police and Fire.

That there should be at least two salaried dentists to care for the teeth of the members of the Bureau of Police and one salaried dentist to care for the teeth of the members of the Bureau of Fire.

WM. B. MILLS,

Superintendent.
